

***ON IN SECONDS
PROTECTS FOR HOURS
LASTS FOR YEARS***

ANKLE BRACING. *EVOLVED.*

PROTECTION THAT WON'T LIMIT PERFORMANCE

COMFORT

The flexible soft shell absorbs your body heat to help form fit to the ankle. You don't get used to the Ultra Zoom, it gets used to you. It takes seconds to put on then stays on your ankle, not your mind.

LIMITLESS PROTECTION

The hinged Ultra Zoom allows your ankle to move in all the natural ways needed to play your sport while helping restrict excessive ankle twisting and turning that causes high and low ankle injuries. You'll play better and play more, losing less time to injuries.

DURABLE

The Ultra Zoom by Ultra Ankle typically lasts youth players two to three years of club and school play before they need replacing. The Performathane® soft shell will never crack, break, or tear. It's on your ankle in seconds, protects you for hours, and lasts for years.

ANKLE SPRAINS ARE THE MOST COMMON SPORTS INJURY IN THE UNITED STATES

45% of volleyball players will injure their ankle during the season.

After spraining an ankle, you're **70% more likely to re-sprain** your ankle. With each sprain, ankle ligaments stretch causing the joint to become unstable.

Prevent ankle injuries before they happen with an ankle brace that doesn't weaken your ankle by restricting the joint's natural range of motion.

LACE-UP BRACES

Lace-up braces restrict all ankle range of motion by binding up the joint. Since your ankle is working against the brace to move, your performance is negatively impacted and the brace loses support rapidly.

ANKLE TAPE

Like a lace-up brace, ankle taping restricts all natural range of motion needed to play and then loses support rapidly. It's also 3x more expensive than bracing over the course of one sports season.

ULTRA ZOOM

The hinged Ultra Zoom moves *with* the ankle's natural range of motion—only restricting any movement that may cause an injury. You're able to run and jump without limits and perform at your best.

Ankle Brace Features	Lace-Up	Hard Plastic	Ultra Zoom®
Fits Either Ankle	✓	✓	✓
Easy Application		✓	✓
Full Range of Motion		✓	✓
Protects Volleyball Players for 2-3 Years			✓

WHY WEAR ANKLE BRACES?

When ankle ligaments are stretched from an injury, they remain stretched and increase your risk for reoccurring injuries. Wearing an ankle brace will help prevent an injury, or lessen the severity should one occur.

DO BRACES WEAKEN THE ANKLE?

Ankle braces with a hinge that allow for full natural range of motion will not weaken your ankle. The only ankle braces that may weaken the ankle are those that restrict your joint from moving up and down like lace-ups or tape.

I WEAR A LACE-UP BRACE - WHY SWITCH?

All ankle braces are not equal in protection, comfort, durability, and impact on performance. The Ultra Zoom outranks lace-ups in all of these categories. Reference the chart on the inside page to see how your ankle braces compare.

FIT & SIZING TIPS

- To order the correct size, reference the size chart and measure your ankle circumference. **Do not use shoe size.**
- As you break in the Ultra Zoom it will form-fit to your ankle, becoming foot specific. **Mark your braces** RIGHT and LEFT on the white tab inside the upper strap.
- If needed, **extra long straps** and replacement straps/pads are available.
- The first time you're wearing the brace you'll need to **significantly loosen your shoelaces** before putting your shoe on.
- The Ultra Zoom may require a **2-3 practice break-in** period to achieve 100% comfort. Fit and comfort issues can be resolved by emailing our athletic trainers at support@ultraankle.com or calling 317-520-9898

MEASURE AROUND ANKLE • DON'T USE SHOE SIZE

SMALL / MEDIUM
14in (35½cm) & below

LARGE / X-LARGE
14in (35½cm) & above
